4-Wheeler Skid Mount

Operating Instructions

1. Before Spraying-Fill the tank at least half full of clean water and check to make sure there are no leaks or loose connections.
2. For solutions that need to be diluted or mixed with other compounds, mix them in a suitable container before filling the tank.
3. Once the solution is ready, fill the tank and replace the vented lid.
4. Press the power rocker switch to "ON" and spray.
5. To turn the sprayer off press power rocker switch to "OFF".
6. Drain the remaining solution into a suitable container.

Winterizing Maintenance

If the sprayer will be stored outdoors or in freezing conditions it must have a 50/50 solution of antifreeze and water run through it. Place at least one gallon of the mixture into the tank and turn the power and trigger on until the mixture has been run through the entire sprayer.

Troubleshooting

Problem	Cause	Solution
Pulsation; Pump cycling on & off	Restricted pump delivery`	Check discharge lines, fittings, valves, spray nozzles, and inline filter for clogging and remove obstruction
Motor operates, but no pump discharge	Air leak in intake line; Punctured or defective diaphragm, pump check valve, or pump housing	Replace or repair
Pump stays on after spray gun trigger has been released	Sprayer tank empty; Defective or punctured part	Refill tank; Check and repair or replace
Low flow or pressure	Air leak at pump intake; Debris in side pump , plumbing, or filter	Repair, replace, or clean
Pump motor stops running	Batter discharge; Motor overheated	Recharge battery; Turn off power at let motor cool down
